NPORT-P: Part E: Explanatory Notes (if any)

The Fund may provide any information it believes would be helpful in understanding the information reported in response to any Item of this Form. The Fund may also explain any assumptions that it made in responding to any Item of this Form. To the extent responses relate to a particular Item, provide the Item number(s), as applicable.

Note Item B.3.a

Explanatory We have followed the convention of DV01 representing the change in value for a 1 bp decrease in interest rates.

Notes The results are based on our models and account for all effects we believe are material to the valuation of the instrument, including changes in cashflows and discounting. We have interpreted the maturity buckets as tenors of interest rate exposure, rather than legal maturity related instruments, as we believe this most accurately captures the risk provide of the portfolio. In particular, for bonds in the portfolio, we have used the expected weighted average life of the instruments rather than our legal maturity.

Note Item B.3.a

Explanatory The results do not include the fund's unsecured debt, which is marked to market, and has associated interest rate
Notes hedges which are included. A summary of interest rate risk with and without the unsecured debt follows: For the Portfolio Excluding Unsecured Debt, DV01 = 22,283; For the Unsecured Debt, DV01 = -17,946; and for the Portfolio Including Unsecured Debt, DV01 = 4,337.

Note Item B.3.b

Explanatory The results are for a 100 bp decrease in interest rates, following the same conventions described in part a. Given
Notes that for shocks of this magnitude there may be asymmetries between the effects from upward and downward rate changes, we also disclose the effects of a 100 bp increase in interest rates here: DV100 - Rates Up for USD 3M = -1,803, 1Y = -380,552, 5Y = -1,705,402, 10Y = 16,096, 30Y = -5,936; DV100 - Rates Up for EUR 3M = -27,777, 1Y = -93,897, 5Y = -3,162, 10Y = 839, 30Y = 0. The results do not include the fund's unsecured debt, which is marked to market, and has associated interest rate hedges which are included. A summary of interest rate risk with and without the unsecured follows: For the Portfolio Excluding Unsecured Debt, DV100 - Rates Down = 2,255,400, DV100 - Rates Up = -2,201,234; For the Unsecured Debt, DV100 - Rates Down = -1,718,809, DV100 - Rates Up = 1,870,421; and for the Portfolio Including Unsecured Debt, DV100 - Rates Down = 536,591, DV100 - Rates Up = -330,813.

Note Item B.3.c

Explanatory The results are for a 1 bp decrease in credit spreads, and following the same maturity bucketing conventions as
Notes in parts a and b.
