NPORT-P: Part E: Explanatory Notes (if any)

The Fund may provide any information it believes would be helpful in understanding the information reported in response to any Item of this Form. The Fund may also explain any assumptions that it made in responding to any Item of this Form. To the extent responses relate to a particular Item, provide the Item number(s), as applicable.

Note Item B.3.a

We have followed the convention of DV01 representing the change in value for a 1 bp decrease in interest rates. The results are based on our models and account for all effects we believe are material to the valuation of the instrument, including changes in cashflows and discounting. We have interpreted the maturity buckets as tenors of interest rate exposure, rather than legal maturity related instruments, as we believe this most accurately captures the risk provide of the portfolio. In particular, for bonds in the portfolio, we have used the expected weighted average life of the instruments rather than our legal maturity.

Note Item B.3.b

The results are for a 100 bp decrease in interest rates following the same conventions described in part a. Given the shocks of this magnitude there may be asymmetries between the magnitude of effects from upward and downward rate changes, we also disclose the effects of a 100 bp increase in interest rates here:USD 3M, 1Y, 5Y, 10Y, 30Y = -5,852, -187,760, -2,139,792, 2,435, 941, respectively. EUR 3M, 1Y, 5Y, 10Y, 30Y = -6,495, -97,969, -29,571, 1,887, 0, respectively.

Note Item B.3.c

The results are for a 1 bp decrease in credit spreads, and following the same maturity bucketing conventions as in parts a and b.
